# Tips for Medical Scientific Experts

**Part 2:** 

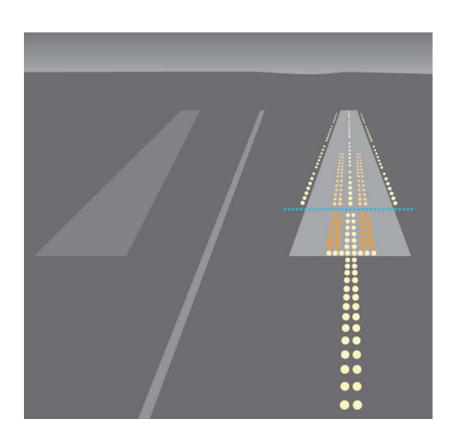

Verbal and Visual Aspects of Great Presentations

Effective-Presentations\_Verbal-and-Visual-Aspects

# The Verbal Part of Your Presentation

### Your Audience

#### Words

Choose carefully

### Nephrologists:

Kidneys, renal function, Glomerular filtration rate ...

### Cardiologists:

Heart, vessels, cardiovascular function, ejection fraction ...

# Speak the truth, but speak it pleasantly

Zarathustra, 1000 B.C.

## Make the message positive: Use affirmative statements

There is no other way ...

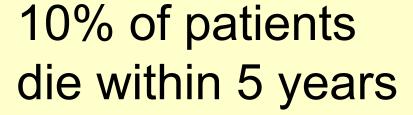

There is only one way ...

No negative effect on the metabolism

Metabolically neutral

90% of patients are alive after 5 years

Examplex reduces mortality

Examplex prolongs survival

# Fewer side effects

## Better tolerability

#### **Attractive Headlines**

Analysis

- Results
- Summary
- Conclusions
- Lessons learned

## One option is 20% superior

?

?

Clear

20% difference

20% increase

20% improve-ment

#### **Alternatives to 'Prove'**

Validate

Document

Confirm

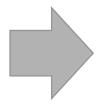

Highlight

Support

Emphasize

Underline

You misunderstood me

Let me explain

## **Impact**

People should be able to read your charts

# Charts Most frequent mistake

Poor legibility

Most frequent reason:

Font size too small ...

# Type of Typography

#### **Common Fonts**

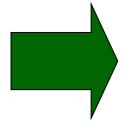

Arial

Calibri

**Tahoma** 

Microsoft Sans Serif

## Negative Typography

Positive Typography

#### CAPITALS

## THIS TRIAL CONFIRMS THAT SUBSTANTIN CAN IMPROVE ...

Use upper and lower case letters

This trial confirms that substantin can improve ..

Stay away from italic style

This <u>trial confirms</u> that <u>substantin</u> can <u>improve</u> ...

#### Avoid underlining

This trial confirms that substantin can improve ...

#### Use line spacing > 1.1

#### Colours

Light-coloured letters on a light-coloured background are difficult to read

Ensure sufficient contrast

# Some people love backgrounds (wallpaper style)

# Use a white or light background

## **Best Number** of Bullet Points of Bullet Points

## Second **Best Number**

"Triplet" ...

### **Avoid "Unlucky" Numbers**

Italy Europe China

## Diagrams

Do not read your slides ...

They are called visual aids for a reason ...

# Ways to express your content in your charts

#### **Ask: Essential Charts**

Which 20% of my charts produce 80% of the impact that I wish to generate?

## Speed of processing information

Text Slow

Table Medium

Diagram Rapid

Image Very rapid

#### Example One, Version 1

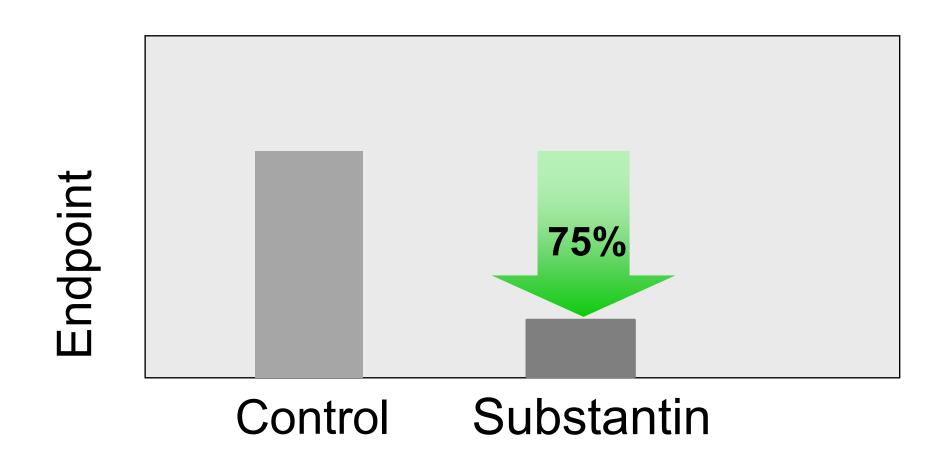

Substantin reduces endpoint by 75% (from 100 to 25), compared to the control group.

#### Example One, Version 2

## **Endpoint**

Control	Substantin
100	25

#### Example One, Version 3

#### Example Two, Version 1

## Results: Recall

Improvement	Same	Deterioration
50%	48%	2%

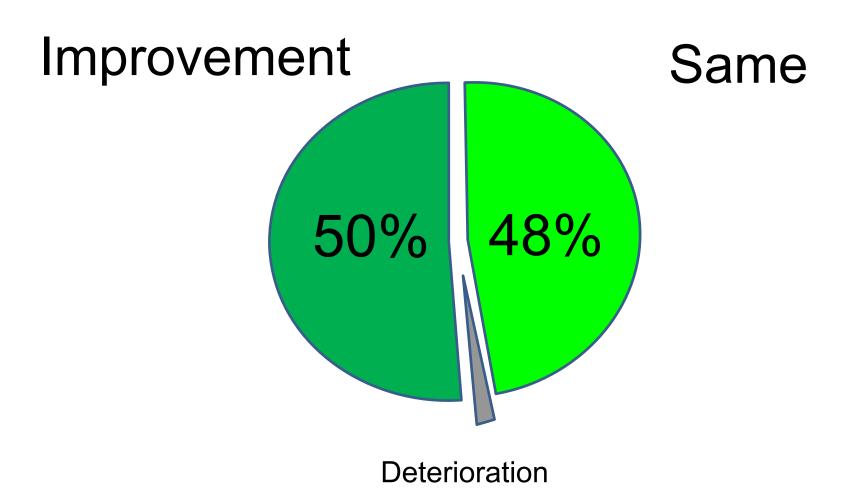

#### Example Two, Version 2

Deterioration 2%

Same 48%

Improvement 50%

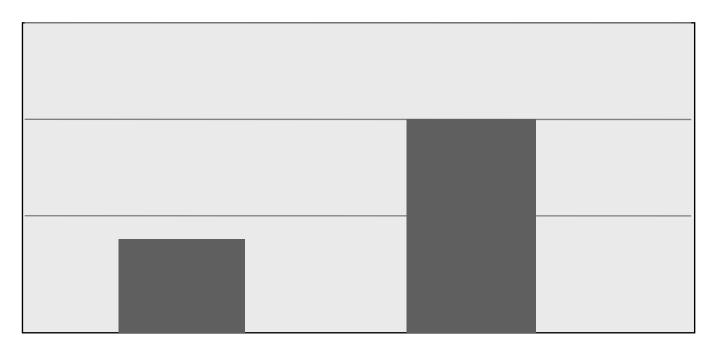

#### Example Two, Version 3

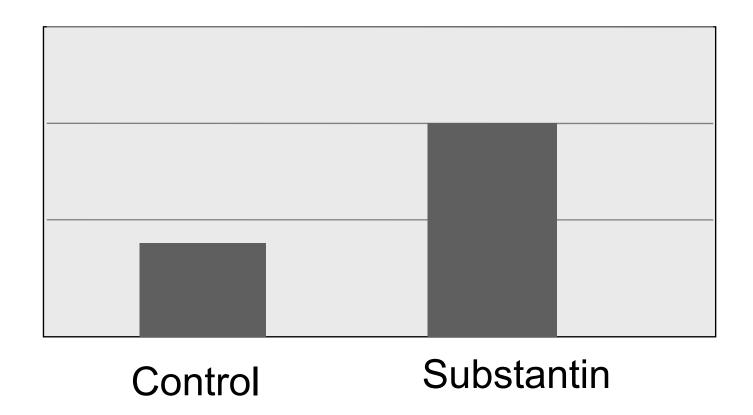

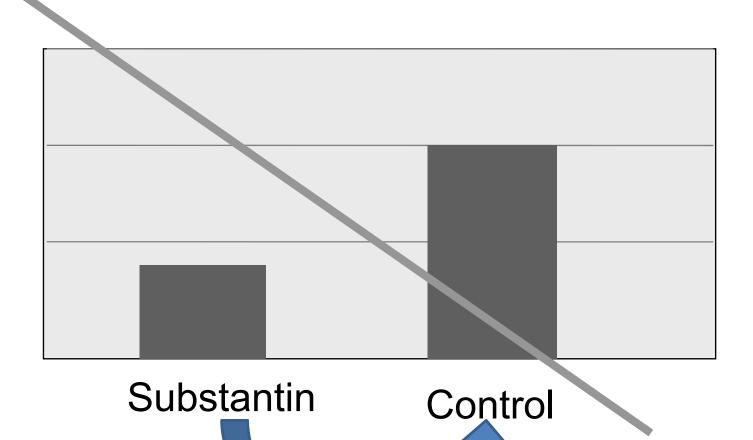

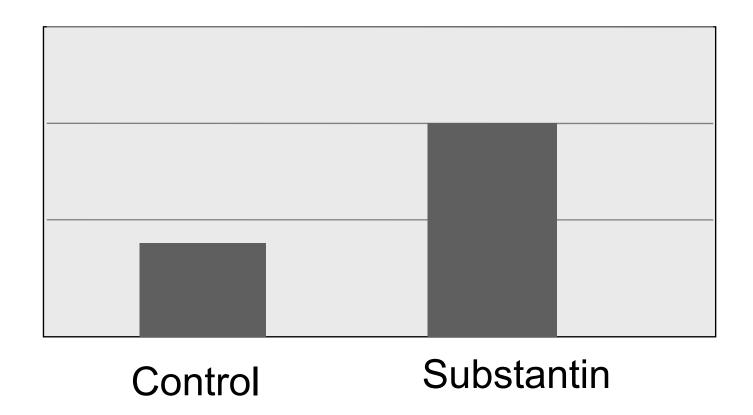

Do *not* "copy and paste" files or scanned documents into your key charts

. . .

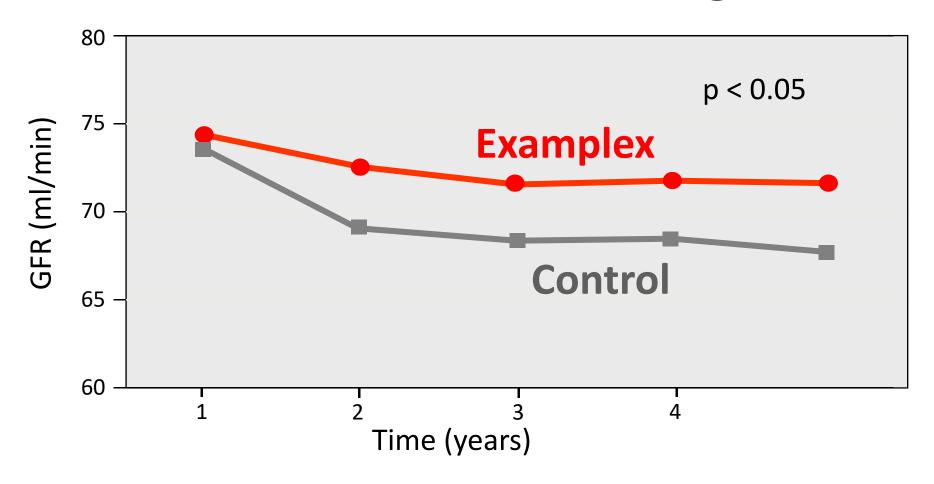

## Placebo or Control: Color

Grey

## Statement Below Diagram

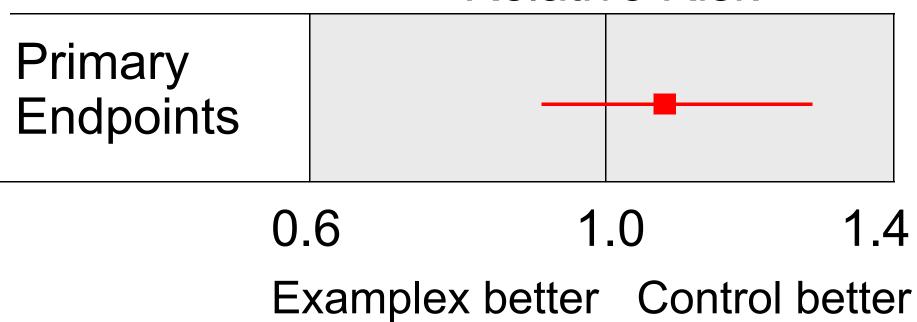

Examplex helps to maintain renal function

#### **Outcome**

## Selected aspect

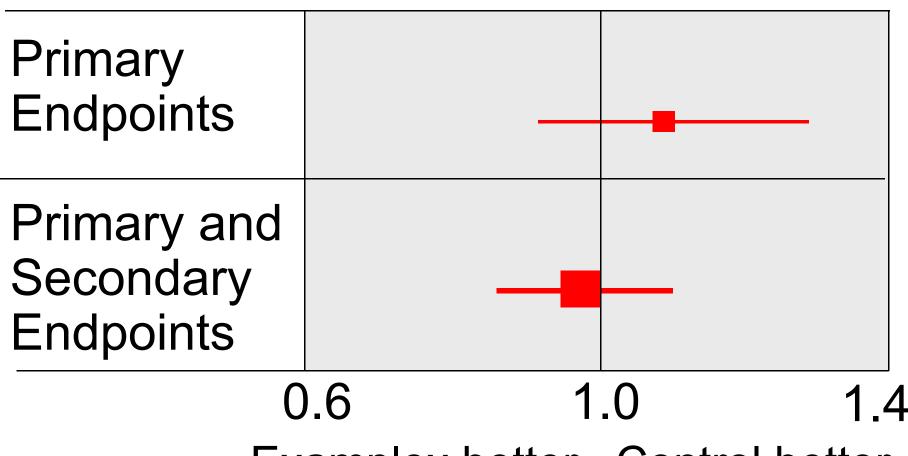

#### **Outcome**

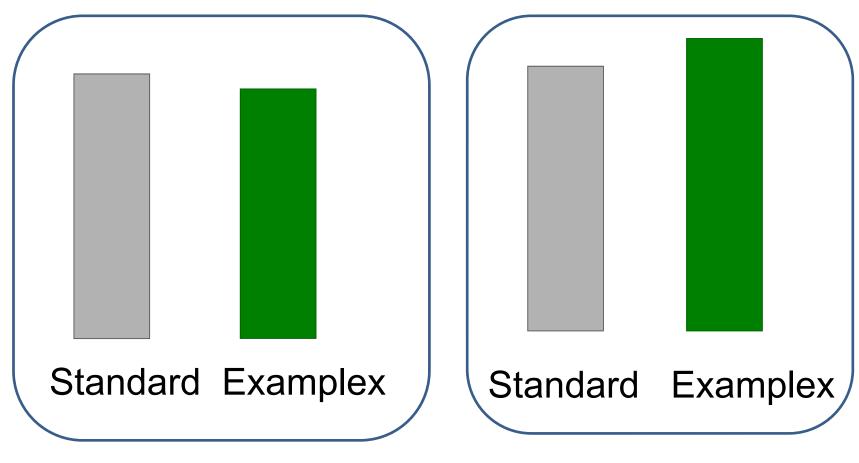

## Comprehensive

Examplex better Control better

## Statistical Analysis

Intention-to-Treat

Per-Protocol

• • •

## If you have the copyright

## **Avoid Numbering**

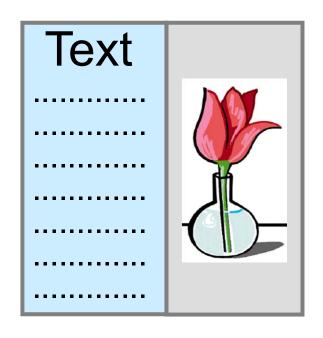

#### What will the Audience Think?

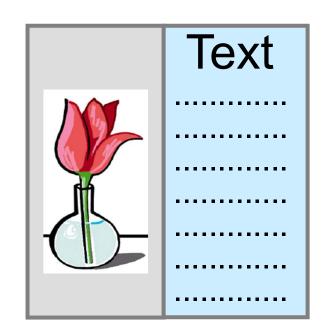

Oh, how long will this speaker take?

## **Avoid Long Footers**

Department of ABC, Institute of DEF, University Hospital GHI, City of JKL, Country

## Layout (Vertical)

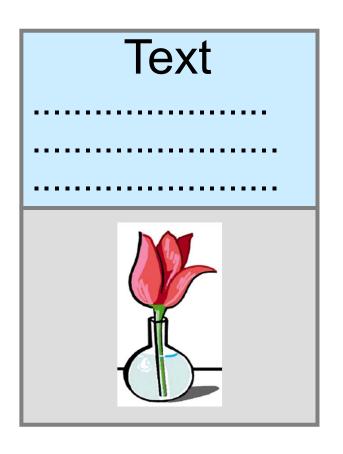

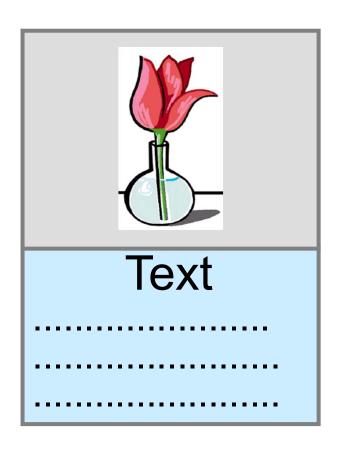

?

## Layout (Horizontal)

?

## **Animation**

Use sparingly

Best: Wipe

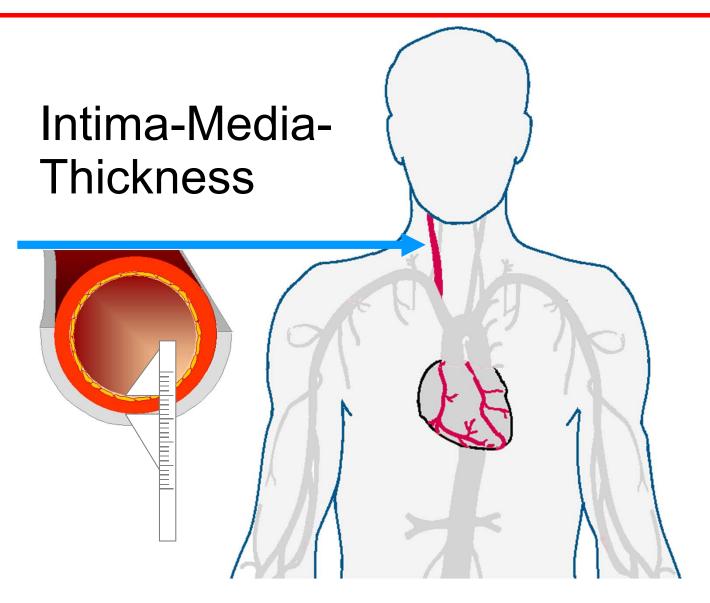

## Use images

### Intima-Media-Thickness

Intima-Media-Thickness

## Intima-Media-Thickness

## **Impact**

- 1) Visual elements (pictures ...)
- 2) Headlines, statements below pictures

- 3) Subheadlines, bullet points
- 4) Regular text ("copy", "Fließtext")

## Design

## Resist the Temptation

- Embellishments
- Decorations
- Ornaments
- "Make it beautiful"

## Keep it clean

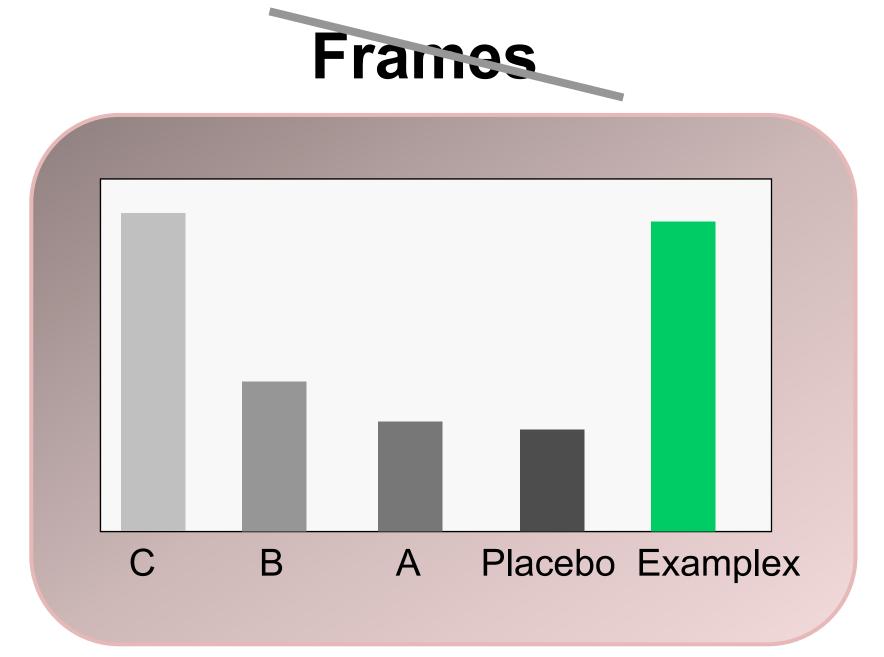

#### Communicator

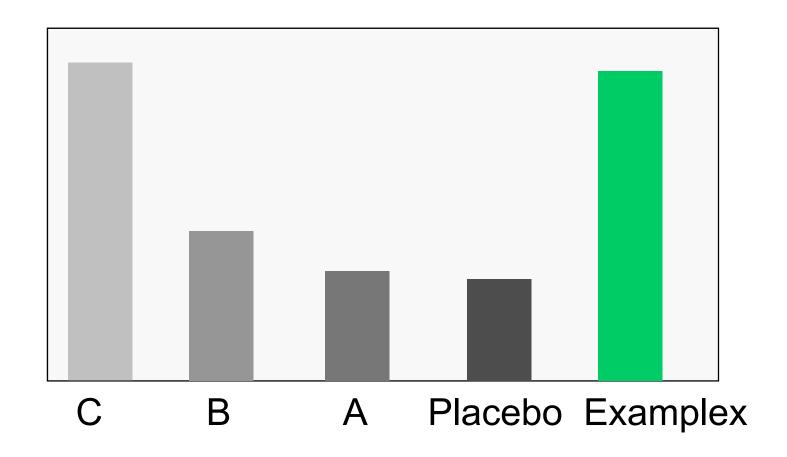

FANCY
Colourful
Decorative

Clean
Compelling
Straightforward

Circus Look

**Impact** 

## **Emotional Impact**

## Tell a Human Interest Story

Case Study

- Patient
- Physician
- Investigator
- You

## This concludes part 2 of the program
